PROFILE

Software engineer with commercial C# experience developing interactive Unity applications at MX Reality and a strong focus on full-stack .NET development. Skilled in object-oriented development, debugging, version control and cross-functional delivery across desktop, Meta Quest VR and mobile platforms, with hands-on experience building modern applications using ASP.NET Core Web APIs, Angular, TypeScript, SQL Server and Azure.

TECHNICAL SKILLS

Languages: C#, TypeScript, SQL, HTML, CSS

Backend and data: ASP.NET Core, Web APIs, Entity Framework Core, SQL Server, SignalR, JWT

Frontend: Angular, Tailwind CSS

Cloud and tools: Azure, Git, GitHub, GitLab, ClickUp, Visual Studio, VS Code, Swagger

Engineering practices: SOLID, dependency injection, service and repository patterns, unit and integration testing, CI/CD

Additional: Unity, Unreal Engine, Adobe Photoshop, Microsoft Office

EXPERIENCE

Unity Developer | MX Reality

London | Jan 2023 - Oct 2025

- Contributed to more than seven interactive training, education and simulation projects in Unity using C#, delivered across desktop, Meta Quest VR headsets and mobile devices.
- Developed user and player interaction systems, translating project requirements into reliable, reusable application functionality.
- Developed a reusable Unity component that displayed arrays of images in multiple configurable layouts and styles, making it easier for the team to create consistent interactive content.
- Collaborated within a cross-functional team of approximately 12 developers, 3D artists and animators to integrate technical functionality with production assets.
- Used GitLab branches, merge requests and code reviews alongside ClickUp for issue tracking, sprint planning and team coordination.
- Debugged and tested applications throughout development, gathering feedback from colleagues and other testers and applying improvements before delivery.

Customer Assistant | Tesco

London | Nov 2019 - Dec 2022

- Resolved customer queries in a fast-paced environment and adapted quickly to new operational responsibilities.
- Trained new starters and suggested floor-layout improvements that supported product visibility and sales.
- Handled difficult customer situations calmly and found practical solutions while maintaining a positive service experience.

Game Design Teaching Assistant | Ravensbourne University

London | Nov 2019 - Apr 2020

- Taught students Unity fundamentals and supported them in turning early concepts into workable game ideas.
- Adapted explanations to individual learners and coordinated with the lecturer on teaching approaches.
- Provided one-to-one guidance that helped students refine their concepts and communicate their design ideas with confidence.

EDUCATION

BA (Hons) Game Design - Upper Second-Class Honours (2:1) |

London | 2019 - 2022

Ravensbourne University

BTEC Creative Media Production (DDD); A-Level Film Studies (C) | Havering

London | 2017 - 2019

Sixth Form College

TRAINING AND CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) | Completed

Developing Solutions for Microsoft Azure (AZ-204) | Currently studying

HOBBIES AND INTERESTS

When I'm not learning new technologies or building applications, I enjoy spending time on a variety of hobbies and activities. One of my main interests is gaming, although I don't play as much as I used to. Some of my favourite games at the moment are Tekken 8 and Marvel Rivals. I also enjoy staying active and regularly go to the gym, as well as taking part in activities such as gymnastics and snowboarding. Growing up, football was the main sport I played, and although I still enjoy watching and playing football, I also believe it's important to explore different sports and activities because you may discover new interests and experiences.
