- Trusted to handle company finances when operating the till, also assuming responsibility for the training of new staff
- Demonstrating strong time management skills to balance stock replenishment with the resolution of customer queries
- Proactively assisting elderly and impaired customers with the location and transportation of shopping
- Employing a range of communicative techniques to calmly diffuse situations involving hostile customers

Customer Assistant*Domino's Pizza***London, UK**

June 2017 - Jan 2018

- Demonstrating exemplary customer service, listening attentively to customer enquiries and ensuring that requests are fulfilled as efficiently as possible
- Maintaining a clean working environment at all times, making sure all tasks can be carried out safely and all food is prepared hygienically
- Communicated well with team members, allowing all orders to be accurately prepared as a result of seamless teamwork
- Calmly yet assertively diffused situations involving hostile customers, ensuring the safety of both customers and employees alike

ABOUT ME

Hi, I'm Banji Shittu, a software engineer who primarily works with the .NET stack. Before transitioning into software engineering, I worked as a Unity developer at MXReality, where I developed interactive learning and simulation experiences using Unity and C#. Over time, I wanted to expand my knowledge beyond game development and explore how large-scale applications and modern web systems are built. This led me into full-stack software engineering, where I now focus on building modern applications using technologies such as ASP.NET Core, Angular, SQL Server, and Azure.

HOBBIES & INTERESTS

When I'm not learning new technologies or building applications, I enjoy spending time on a variety of hobbies and activities. One of my main interests is gaming, although I don't play as much as I used to. Some of my favourite games at the moment are Tekken 8 and Marvel Rivals.

I also enjoy staying active and regularly go to the gym, as well as taking part in activities such as gymnastics and snowboarding. Growing up, football was the main sport I played, and although I still enjoy watching and playing football, I also believe it's important to explore different sports and activities because you may discover new interests and experiences.
